Education

University of Guelph Guelph, ON

Bachelor of Computing in Software Engineering with co-op, Minor in Project Management *Sep. 2023 – Apr. 2027*

- Cumulative GPA: (3.7/4.0)
- Relevant Coursework: Data Structures, Object-Oriented Programming, Software Design I/II/III, Operating Systems, Database Systems, Algorithm Analysis & Design, Software Systems Development & Integration, Systems Analysis & Design (UX focus)
- Extracurriculars: Guelph Women in Computer Science, Guelph Coding Community

Experience

Project Manager Sep. 2025 – Dec. 2025

Cube Packaging Solutions *Aurora, ON*

- Led enterprise platform migration project for 6 departments, migrating 1,232 product records and achieving 100% user adoption
- Designed data models and workflows for product management, implementing data validation and quality controls
- Developed 91 automated workflows using JavaScript and platform APIs, improving operational efficiency by 15+ hours weekly
- Provided technical support to 11 users, troubleshooting issues and delivering training on new systems
- Created comprehensive documentation including user guides, training materials, and system specifications
- Collaborated with stakeholders across multiple departments to gather requirements and ensure successful implementation

Web Application Developer Jun. 2025 – Aug. 2025

Meadowvale East Apostolic Church *Scarborough, ON*

- Developed full-stack food bank management application serving 80+ weekly users with React Native mobile app, Firebase backend, and PHP web integration
- Designed user interface and user experience with focus on accessibility and ease of use for community members with varying technical literacy
- Built RESTful API architecture connecting mobile frontend with cloud backend services, implementing real-time data synchronization
- Engineered database schema in Firebase Firestore with data models for user authentication, activity tracking, and operational management
- Integrated QuickBooks API for automated payroll data processing for 20 staff members
- Implemented accessibility standards (WCAG 2.1) and optimized application performance across platforms
- Provided technical support to users and created documentation for system maintenance

STEM Program Coordinator Jul. 2024 – Aug. 2024

STEM Camp *Kitchener, ON*

- Led coding and robotics instruction for 40+ students aged 4-13, developing curriculum and hands-on activities
- Managed program operations including scheduling, equipment coordination, and team supervision

Volunteer Experience

Audio/Visual Team Member Sep. 2020 – Present

Kingdom Stars Assembly *Guelph, ON*

- Provide technical support and troubleshooting for audio/visual systems, streaming infrastructure, and network equipment
- Install, configure, and maintain computers, projectors, sound systems, video equipment, and technical infrastructure
- Diagnose and resolve hardware and software issues under time-critical conditions during live services
- Perform routine system maintenance including equipment testing, updates, and preventive diagnostics
- Train team members on equipment operation and troubleshooting procedures

Technical Content Developer Feb. 2023 – Nov. 2024

GlassHouse Systems *North York, ON*

- Developed 2-part cybersecurity training video series for internal teams covering VPN usage, confidentiality protocols, and AI safety
- Designed educational content translating technical concepts into accessible presentations

Projects

Automated Transportation Scheduler | *Python, Google APIs, Algorithm Design*

- Developed automated system serving 27+ weekly users, integrating Google Forms and Maps APIs for intelligent route optimization
- Implemented constraint-based algorithm processing geographic data and generating optimal driver-passenger assignments

Personal Budget Tracker | *React, JavaScript, UI/UX Design*

- Built responsive web application with intuitive interface for expense management and visual spending analytics
- Implemented component-based architecture with React hooks for state management and real-time updates

Portfolio Simulation Software | *Java, Object-Oriented Design*

- Designed investment tracking application using OOP principles with efficient data structures for portfolio management

vCard Contact Manager | *C, Python, MySQL*

- Built multi-layer contact management system with C-based parser, Python middleware, and MySQL database

Technical Skills

Programming Languages: Java, Python, JavaScript, C, SQL, R, PHP, Dart
Web & Mobile Development: React, React Native, HTML, CSS, Expo, Flutter, Responsive Design
Backend & APIs: Node.js, REST APIs, Firebase, API Integration, Microservices
Databases: MySQL, Firebase Firestore, NoSQL, Database Design, Data Modeling
Design & UX: Figma, Adobe XD, Canva, UI/UX Design, Wireframing, Prototyping, Accessibility (WCAG)
IT & Systems: Windows, Linux, Microsoft Office 365, Technical Support, Hardware Troubleshooting
Data & Integration: Data Migration, ETL Processes, Data Validation, Data Workflows, JSON, XML
Developer Tools: Git, GitHub, GitLab CI/CD, Docker, VS Code, IntelliJ IDEA, Xcode
Professional Skills: Project Management, Technical Documentation, Training Presentation, Stakeholder Communication, Problem-Solving
